

## Robotic Total Hip Replacement

David Padden, MD, Orthopedic Surgeon with the Holy Cross Medical Group, performs robotic total hip replacement via an anterior approach to the hip. With the use of the MAKO robot, Dr. Padden is able to perform total hip replacements that require minimal recovery time, without cutting muscle, so you can get back to living your life quicker. One of Dr. Padden's patients, Gregg, has undergone this surgery & tells us about his experience with this procedure & how it has restored his active life. Learn more about our award-winning Orthopedic Institute by visiting [holycrossorthopedics.com](http://holycrossorthopedics.com). For information on Dr. Padden, visit his physician profile:
