

Solving Old OR Problems With New Digital Technology

For many Radiology Technologists like Jamie Rodgers, sending fluoroscopy X-ray images was cumbersome. In the past, Rodgers, a Radiology Technologist with the University of Rochester Medical Center, would have to wait until after an exam to move the mobile C-arm around the hospital in order to find the wired connection to the hospital's PACS system. In some cases, images weren't sent until a day after the initial scans.
